KING EDWARD'S SCHOOLS.

CHAPLAIN'S REPORT, 1871.

To the Right Worshipful the PRESIDENT, the
Worshipful the TREASURER, and the
GOVERNORS of King Edward's Schools.

MY LORDS AND GENTLEMEN,

I have the honor to present to you my Report for the
year 1871.

Between the 1st January and the 31st December there
were—

Admitted.	
Boys.....	66
Girls.....	55
Total.....	121

Discharged.	
Boys.....	52
Girls.....	44
Total.....	96

There were remaining in the two Schools, at the end of the year, 133 boys and 131 girls, making a total of 264 inmates, besides two Pupil Teachers (boys).

You have, as in the previous year, increased the number of inmates by ten in each School. This ought to have left the numbers at the end of the year 260, instead of 264. But, at the last meeting of the Sub-Committee, three boys and one girl, who had long been waiting for vacancies, and had been frequently before the Committee, were admitted in the expectation that vacancies would occur in the course of a few weeks. There still remains room for 20 more in each School, and it is probable that in the present year you will find yourselves in a position to raise the total to the number contemplated by the scheme for the regulation of the Charity approved by the Master of the Rolls in 1860. You will then have 150 children in each School, receiving board, lodging, and clothing, and a plain but solid education, suited to the condition in life from which the candidates are taken, and for such employments as may be provided for them.

Two boys and one girl were admitted from the City of London, on the recommendation of members of the Court of Aldermen. There were no other applicants from that Quarter.

The inmates discharged during the year have been disposed of as follows:—

BOYS.

To the Royal Navy	11
To the Army	5
To the Merchant Navy	7
To Situations—various	14
Emigrated	3
To Friends, by request	12
Total	<hr/> 52

GIRLS.

To Situations as Domestic Servants.. .. .	39
Sent Home, ill	1
Sent Home, unfit for School	1
To Friends, by request	2
Died	1
Total	<hr/> 44

You will perhaps note that as compared with former years, very few boys have entered the Royal Navy. That is so: and it is accounted for by the fact that the Lords of the Admiralty have thought proper to abridge the time during which second class boys are to remain in the Training Ships, and have stopped all entries of boys under 15 years of age, except from the Royal Naval School, at Greenwich. This has obliged me to retain in the School a considerable number of boys who, under the former regulations, would, by special leave, have entered the service at the age of 14 and six months.

The Girls' School was examined on Tuesday, June 27th, by the Rev. J. WALLACE, Chaplain of the Magdalen Hospital; the Boys' School on Thursday, July 20th, by E. C. TUFNELL, Esq., H. M. Inspector. I transcribe their Reports.

“THE MAGDALEN,
“STREATHAM. S.W.

“MY DEAR SIR,

“I have to report to the Governors that I found the amount of instruction imparted to the girls in King Edward's School, in my judgment, very sufficient, so far as I was able to test it. Not *quite*, perhaps, up to the mark of last year. The children were bright, yet respectful. I may, however, be allowed to add, that I do not think it possible properly to examine children, so many in number, in the short time allowed, and I think the examiners should have the children by themselves.

“I am, my dear Sir,

“Truly yours,

“J. WALLACE.

“J. BAGGALLAY, ESQ.,

“*Treasurer.*”

I agree with Mr. WALLACE in thinking that this examination was not quite so satisfactory as it might have been. But I ought, in justice to the late School-Mistress, to mention that her health had for some months been in a failing condition, and that she has since then found it necessary to retire from the service of the Governors after 30 years' labour in their employ. The Governors have, in consideration of her long and faithful services, awarded her a liberal pension. There is, I think, much force in Mr. WALLACE's concluding remark; but the rule fixed by the Court of Chancery so imperatively requires the Examinations to be conducted “in the presence of the Governors,” that I am unable to see in what way his suggestion can be adopted. Those who have been present on these occasions are aware

of the difficulty the Governors have, in consequence of the pressure of other engagements, in attending in any considerable number; and I fear that for this reason it would be impossible to lengthen the period of examination in any appreciable degree.

Mr. TUFNELL's report on the Boys' School is as follows:—

“Examined this School. The children passed a very satisfactory examination, which showed careful attention to their duties on the part of the teachers, and diligence in the pupils. The writing and spelling was especially worthy of commendation. I must add a remark on the cleanly and healthy appearance of the boys.

“E. CARLETON TUFNELL,
“*H. M. Inspector of Schools.*”

Prizes were again awarded to six of the most deserving scholars in both Schools, to which the Treasurer and Chaplain added one to each of the Pupil Teachers.

The Pupil Teacher system adopted in the Boys' School last year has proved so successful that it is proposed to adopt it in the Girls' School also; and two of the most intelligent girls have already been selected, and are now on probation.

A very noticeable event in the Girls' School was the visit of the LORD BISHOP OF WINCHESTER, on Wednesday, September 27th, when His Lordship confirmed 65 of the pupils in the Chapel. Fifty-four of the Candidates presented themselves voluntarily at the Holy Communion on the following Sunday. This circumstance must have been

especially gratifying to the Assistant Chaplain, the Rev. W. FAULKNER, who, in my unavoidable absence at Witley, is principally responsible for the religious and moral training of the girls. I am greatly indebted to my zealous colleague for the attention he devotes to his work, and for the kindly interest he takes in all that concerns the spiritual and temporal welfare of the female inmates. I may mention here that the Bishop proposes to hold a Confirmation in the Parish Church of Witley, during the ensuing spring, when I shall hope to have the satisfaction of presenting to him some candidates from the Boys' School.

The Annual Concert at Witley took place on Tuesday and Wednesday, January 10th and 11th. On the latter evening the Treasurer and one or two other Governors kindly favoured us with their company; and on each occasion the attendance of our neighbours was very large, and, I think I may say, the performance very creditable and pleasing.

One hundred and thirty-eight rewards have been paid by the Committee during the year, to former inmates who brought certificates of good conduct from their employers. Forty boys and 25 girls were rewarded for the first time; 25 boys and 9 girls for the second time; and 29 boys and 10 girls for the third and last time.

I must apologise for the unusual brevity of my report. But really the work of both Establishments has proceeded with such unbroken regularity, and the year has been marked by so few events of exceptional interest, that I have nothing more to record.

With the sanction of the Committee, I have slightly altered the form of one of the tabulated statements; omitting some details which are no longer applicable to the existing state of the Institution, and adding some information as to the educational standard reached by the children at the time of their admission, which will, I hope, be found interesting to those who care to examine these tables. The average period of residence in the Schools also appears for the first time in that part of my report.

It only remains for me to acknowledge with gratitude the confidence with which the Governors have honored me for the 16 years during which I have held office under them, and to assure them that my best efforts will ever be made to justify and retain it.

I am, my Lords and Gentlemen,

Your obedient Servant,

EDWARD RUDGE,

Chaplain and Superintendent.

Witley, January 17th, 1872.

REGULATIONS.

1. The Boys are in two divisions, which attend the Shops, &c., and the Schools, on alternate days, receiving on an average $15\frac{1}{2}$ hours Instruction in School, and 24 hours Industrial Employment per week.

2. Half Holiday every Saturday, from 12 a.m., when boys are to bathe.

3. Choir Practice, and Fife and Drum Band, on alternate days, from 12 to 12.45 p.m.

4. Drill for School Boys, in summer from 5 to 5.45; and in winter from 12 to 12.45, when weather will permit.

The whole School to Drill twice-a-week during summer months, after supper.

* Half-an-hour later in Winter Months.

LONDON.

No. 10.

DAILY ROUTINE.

Hours of Rising.

Six o'clock in the summer months, and not later than 7 o'clock in the winter months.

After private prayer in each dormitory, washing, dressing, &c.

On Week-days.

The girls selected for employment in the Laundry and Kitchen, and in Household Work, to be engaged in their particular occupations, and the rest in making beds, and sweeping and cleaning the dormitories and other apartments on the female side.

From 8 to 9 o'clock.—Prayers, breakfast, and recreation.

Girls selected for particular employments to be at their respective occupations from 9 to 1 o'clock, as the Matron shall direct; and on alternate days at school during the same hours.

From 1 to 2 o'clock.—Dinner and recreation.

Girls selected for particular employments to be at their respective occupations, and the rest at needlework, from 2 till 5 o'clock, and in occupation from 5 till 6 o'clock, as the Matron shall direct.

From 6 to 7 $\frac{3}{4}$ o'clock.—Supper and recreation.

From 7 $\frac{3}{4}$ to 8 o'clock.—Prayer.

8 o'clock.—Bed-time.

On Saturdays.

No school to be kept, either in the morning or afternoon. The girls on this day to be engaged in cleaning the establishment, assorting and distributing clean linen, using the bath, and in such other occupations as the Matron shall direct. The recreation of the inmates to be, when the weather will permit, in the airing grounds, and at other times in the day-rooms, which are to be provided with suitable books for amusement and instruction.

On Sundays.

Until 8 o'clock.—The inmates to be occupied in *making beds, changing linen, and delivering up all that is dirty*, and preparing for the proper spending of the day.

From 8 to 10 o'clock.—Breakfast, and walking in the airing grounds, when the weather will permit.

From 10 to 12 o'clock.—In school rooms, reading the Lessons for the day, repeating Catechism, and answering questions on scriptural subjects.

From 11 to 1 o'clock.—In Chapel for Morning Service and Sermon.

1 o'clock.—Dinner.

From 1 $\frac{1}{2}$ to 3 o'clock.—In the day rooms, and airing courts.

3 o'clock.—Afternoon Service in Chapel and Sermon.

7 o'clock.—Supper.

8 o'clock.—Bed-time.

BETHLEM HOSPITAL.

REPORT.

To the Right Worshipful the PRESIDENT, the
Worshipful the TREASURER, and the
GOVERNORS of the Royal Hospital of
Bethlem.

MY LORDS AND GENTLEMEN,

In conformity with the regulations of my office I beg to lay before you a Report for the year 1871, accompanied by the usual Statistical Tables.

During the year, 179 patients were admitted; 180 were discharged; and 16 died.

On the 1st January of the present year 240 patients remained in the Hospital, arranged according to the following classification :—

	Males.	Females.	Total.
Curable	68	117	185
Incurable	25	30	55
Criminal.. ..	—	1	1
	<hr/> 93	<hr/> 148	<hr/> 241

The 179 patients *admitted* were as follows :—

	Males.	Females.	Total.
Curable	62	117	179

The patients *discharged* were :—

	Males.	Females.	Total.
Cured	35	72	107
Uncured.. ..	36	28	64
For special reasons	4	5	9
	<hr/> 75	<hr/> 105	<hr/> 180

Sixteen patients died during the year :—

	Males.	Females.	Total.
Curables.. ..	8	8	16

The statistics of one year are of comparatively small value ; but, at the same time, it is a subject for congratulation that the number of deaths has been so small. During the past year small-pox was very prevalent in the neigh-

bourhood, and, in spite of every precaution, three mild cases occurred in the Hospital. Every inmate was vaccinated, and the strictest measures employed to prevent the disease spreading. The three patients—two males and one female—all did well, and have since been discharged recovered.

Again, to repeat an old story, I have to call attention to the condition in which many of the patients are brought to the Hospital, frequently without the slightest hope of recovery, and only to be kept alive for a short time by the most incessant care and attention. At a very recent visit the Commissioners in Lunacy made the following note :—

“Several deaths occurred very shortly after admission from exhaustion after mania or melancholia, having been brought here in almost a dying state.”

With reference to Table No. 28, it is much to be regretted that such a prejudice should exist in the minds of many with regard to post-mortem examinations. In several cases, permission to examine the brain is obtained only with great difficulty, and in many instances is refused altogether. The Commissioners in Lunacy have taken this matter up, and it would certainly prove most beneficial to medical science if a post-mortem examination were insisted on in every case dying in a public Lunatic Hospital.

The per centage of cures on admissions this year is very satisfactory, but, as before stated, the results of one single year cannot fairly be quoted by themselves.

The list of patients discharged uncured is large, and perhaps one of my most painful duties is to recommend to the Committee the removal of patients whose friends cannot afford to place them in private Asylums; and who though suffering from hopeless forms of insanity, are yet most keenly alive to their position, and suffer much from the idea of being made "paupers."

A large Middle-Class Asylum has been much talked of, and it is to be hoped that before long some decided steps may be taken in this matter.

I may here state that few if any cases are discharged until one or two extensions of residence have been granted; and in every case, so long as the slightest prospect of recovery can be held out, the Committee invariably allow the patient to remain. As, however, the chief object of Bethlem is curative, it would be manifestly unfair to fill our beds with incurables and to have no room for the curable cases so frequently seeking admission.

During the Summer Session I delivered a Course of Lectures on Mental Diseases at St. Thomas's Hospital, which was well attended, and many Students availed themselves of the privilege of coming here and practically studying the various forms of insanity.

I hope each succeeding year may help to prove the value of Bethlem Hospital as a clinical school, and that whatever changes may at any time be made, as regards chronic cases,

Bethlem may still remain in its present situation, admirably adapted for the reception of acute cases, and also, as I have said above, for enabling Students to observe for themselves the symptoms and treatment of insanity.

The Convalescent Establishment, at Witley, was occupied for about six months ; during which time it was visited by 35 female and 26 male patients, for periods varying from three weeks to four months.

Miss WATSON, the Housekeeper, has resigned her situation, and at present no successor has been appointed.

During these summer holidays no accident of any kind occurred. Two patients who relapsed were at once brought back to town, without having caused the slightest annoyance or disturbance in the neighbourhood.

Two of the Commissioners visited the Hospital in January, and left the following Report :—

“ BETHLEM HOSPITAL,
“ 31st *January*, 1871.

“ The changes in the patients since our visit to the Hospital, 13th August last have been as follows :—

	Males.	Females.	Total.
Admitted	44	48	102
Discharged	50	73	123
„ of whom recovered ..	19	45	64
Died	13	5	18

“With the exception of a case of suicide by strangulation in the male division, which was duly reported to our Board, the deaths were all from ordinary causes.

“The patients on the books are now 258 in number, viz.:—

						Males.	Females.	Total.
Curables	88	114	202
Incurables	25	30	55
Criminal	—	1	1
Total..						113	145	258

“Upon our visit to-day we saw all but 9, viz.:—three of the male and five of the female sex, absent on leave, and one female patient out for the day.

“Their names will be found in the Patients’ Book.

“The patients entered under the head ‘Incurables,’ are all on the permanent list, and provided with clothing and all necessities.

“The patients last registered as under medical treatment were 14 in number, viz.: six on the male side, and eight on the female.

“We found in bed one male and four females.

“The only instance of the use of mechanical restraint since the last visit has been in the case of a gentleman,

recently admitted, whose hands have been confined nightly for about a fortnight, in order to prevent him from doing himself serious injury.

“During the same period two male and ten female patients have been secluded, for reasons stated in the Medical Journals, the former each twice, and the latter altogether on 65 occasions.

“The attendance at Divine Service in the Chapel continues as heretofore.

“The provision made for the exercise and amusement of the patients, who enjoy frequent meetings for dancing and recreation, is as before reported.

“The patients generally, at the time of our visit, were free from excitement; none made any complaints, and many expressed themselves thankful for the kindness they experienced.

“With very few exceptions, in the male division, the personal condition of the patients, as to clothing and otherwise, was satisfactory.

“We have to report most favourably of the cleanliness and good order of the several galleries and rooms, beds and bedding.

“Further progress has been made, since the last visit, in the way of painting and papering the walls of the galleries, including the sleeping portion of No. 1 on each side.

“The improvements in this respect have already been carried out in all but galleries No. 3 in the male division and No. 1 in the female.

“Beneficial arrangements have also been completed for providing separate accommodation in No. 1 female ward for eight or ten of the worst cases.

“We are glad to learn, as respects the patients in the basement wards, that as many as five or six of each sex partake of the weekly and other evening entertainments and class meetings for singing, reading, &c.

“The comfort of the patients generally has been further promoted by the addition, since the last visit, of blinds and vallances to the windows of the sleeping-rooms; many are still wanting in the male division, but very few in the female.

“The condition of the Hospital and its inmates continues to reflect credit upon Dr. WILLIAMS, who is efficiently aided by Dr. RAYNER.

“In reply to our enquiries relative to the staff of Attendants, that it consists, at present, on the male side, of a Head and 20 Ward Attendants; and on the female of 27, including six Head Ward Attendants, who receive each £5 per annum extra wages.

“The Head Male Attendant’s salary is £60. The wages of the Male Attendants commence at £25 per annum, and rise to £35, and those of the Female Attendants rise periodically from £18 to £25.

“The only changes in the Attendants during the year 1870 consisted of the dismissal of one man— who had been about three months in the service of the Hospital—for neglecting Watchman’s duty ; and the voluntary resignation of two Nurses, all of whose places were filled up.

“ R. W. S. LUTWIDGE, }	<i>Commissioners in Lunacy.</i> ”
“ ROBERT NAIRNE, }	

In a yearly report of this character it appears to me hardly necessary to refer specially to the medical treatment, or to give any statement of particular cases. Much interesting and instructive matter might doubtless be written, but our different Medical Societies, and the Medical Journals, afford opportunities for bringing these matters before the notice of the profession at large. Every means of treatment are placed at our disposal ; and to the Governors of Bethlem I trust the subjoined Tables, especially No. 18, will shew that the Hospital continues to do its work with success, and maintains the character it has held for so many years past.

My best thanks are due to my medical colleague, Dr. RAYNER, and I must also express the obligation I am under to Mr. HAYDON, who, by his cordial co-operation in every-

thing connected with the welfare of the patients, has much lightened my labours. Indeed all, both Officers and Attendants, have ever been ready to give help, and I beg here to tender them my thanks.

In conclusion, allow me to acknowledge with gratitude the kindness I have at all times experienced from the Committee, a kindness it shall be my earnest endeavour to merit a continuance of.

I have the honor to be,

My Lords and Gentlemen,

Your very obedient Servant,

W. RHYS WILLIAMS, M.D.

Bethlem Hospital,

26th January, 1872.

T A B L E S .

Date of Death. 1871.	Date of last Admission.	Age at Death. Civil State.	Mental State and Bodily Condition on Admission.	Duration and Cause of Disorder.	Assigned Cause of Death.	POST-MORTEM APPEARANCES, And weight of the various Organs in Ounces Avoirdupois.		
						HEAD.	THORAX.	ABDOMEN.
July 20	Nov. 22, 1869	36 Single	Symptoms of General Paralysis. Health good.	Six months. Not known.	General Paralysis.	Dura mater adherent; veins gorged; great atrophy of the brain, the convolutions flattened; much serum in the sub-arachnoid space; arachnoid and pia mater opaque in places. Arteries at base slightly atheromatous. Brain substance firm; weight 4½ oz.; of cerebellum 4¾ oz.	Lungs healthy, with the exception of some congestion at bases. Heart 8 oz., healthy,	Liver 52 oz., normal; Spleen 5 oz., normal; Kidneys normal.
July 3	Nov. 16, 1870	52 Widower	Symptoms of General Paralysis. Health fairly good.	Three days. Mental Anxiety.	Erysipelas of face, with General Paralysis.	Cranial bones thickened and increased in density. The arterial channels deeply furrowed. Dura mater universally adherent. Pia mater and arachnoid opaque at base and over the cerebellum. Arteries slightly atheromatous. Weight of brain 41 oz. Cerebellum 6 oz.	The lungs were healthy. The heart somewhat hypertrophied, weight 12½ oz. Valves normal.	Spleen 9 oz.; capsule thickened, and studded with hard rounded whitish nodules (fibrous under the microscope); at one or two points these projected into the substance of the spleen. Gall bladder distended with bile, and two large gall stones. Liver 4 lb. 3¾ oz., slightly fatty; kidneys large and fatty, right 7¼ oz., left 7 oz.

Date of Death, 1871.	Date of last Admission.	Age at Death. Civil State.	Mental State and Bodily Condition on Admission.	Duration and Cause of Disorder.	Assigned Cause of Death.	POST-MORTEM APPEARANCES, And weight of various Organs in Ounces Avoirdupois.		
						HEAD.	THORAX.	ABDOMEN.
Sept. 17	Oct. 18, 1871	21 Single	Acutely maniacal, and in bad health.	One week. Shock from the suicide of his father.	Exhaustion after acute mania.	Dura mater non-adherent; arachnoid and pia mater opaque over the cerebrum; Brain substance firm and pallid. Brain 4¼ oz. Cerebellum 4¾ oz.	Lungs consolidated at the bases, almost entirely airless. Heart 8 oz., normal; valves healthy.	Liver 54 oz., normal; spleen 5 oz., normal; kidneys, right 4¾ oz., left 4½ oz.
Nov. 5	Sept. 26, 1871	52 Married	General Paralysis. Health very bad.	Six months. Cause not known.	General Paralysis.	Dura mater extensively adherent; arachnoid and pia mater opaque at one or two points; Considerable amount of serum in the ventricles and sub arachnoid space. Brain substance firm, somewhat congested. Weight of cerebrum 45 oz.; of cerebellum 6 oz.	Lungs normal; the right weighing 27½ oz., the left 17½ oz. Heart 9½ oz.; with slight thickening of the mitral valve, not apparently sufficient to cause regurgitation.	Spleen 3½ oz., normal; liver 47½ oz., of the nutmeg character; right kidney 4 oz., left 4¾ oz., the cortical portion in both being somewhat shrunken, and the capsule adherent.

OBITUARY.—FEMALES.—1871.

No. 28—*continued*.

Date of Death. 1871.	Date of last Admission.	Age at Death. Civil State.	Mental State and Bodily Condition on Admission.	Duration and Cause of Disorder.	Assigned Cause of Death.	POST-MORTEM APPEARANCES, And weight of various Organs in Ounces Avoirdupois.		
						HEAD.	THORAX.	ABDOMEN.
Mar. 8	Sept. 20, 1870	55 Married	Melancholia. Fairly good.	Three months. Domestic troubles.	Disease of the heart.	Posterior portion of cranium increased in thickness; slight opacity of the arachnoid; slight excess of cerebro spinal fluid; no congestion of the brain substance, which was firm. Weight of cerebrum $4\frac{1}{2}$ oz.; of cerebellum 6 oz.	Heart 13 oz.; its walls fatty and thin; ventricles dilated, containing much clot. In the apex of the right ventricle was an old softened clot of some standing, having a defined wall; this projected into the cavity, and other febrinous clot was deposited on it. Valves healthy. Lungs normal.	Liver fatty and nutmeggy, weight 42 oz.; spleen $3\frac{1}{2}$ oz.; kidneys healthy, right $5\frac{1}{2}$ oz., left $5\frac{3}{4}$ oz.; intestines healthy.
Mar. 20	Feb. 2, 1871	18 Single	Melancholia. In very bad health.	Two weeks. Anxiety.	Exhaustion, after acute melancholia.	Dura mater generally adherent; arachnoid and pia mater thickened and opaque in many places; brain substance without appreciable change; ventricles normal; slight excess of cerebro-spinal fluid. Cerebrum $40\frac{3}{4}$ oz.; Cerebellum $5\frac{3}{4}$ oz.	The lungs were almost airless in their lower lobes, of a greyish color, easily breaking up under pressure. Heart $7\frac{1}{2}$ oz.; walls healthy; valves normal.	Liver $40\frac{1}{2}$ oz., normal; spleen $3\frac{1}{2}$ oz., normal; left kidney $4\frac{1}{2}$ oz., right $4\frac{1}{2}$ oz.

Date of Death. 1871	Date of last Admission.	Age at Death. Civil State.	Mental State and Bodily Condition on Admission.	Duration and Cause of Disorder.	Assigned Cause of Death.	POST-MORTEM APPEARANCES, And weight of the various Organs in Ounces Avoirdupois.		
						HEAD.	THORAX.	ABDOMEN.
April 9	Mar. 2, 1871	48 Single	Acute Melancholia. In very bad health.	Four months. Domestic trouble.	Exhaustion, after acute melancholia.	Dura mater slightly adherent; arachnoid and pia mater with slight opacities; general excess of venous blood; arteries at the base of the brain very atheromatous. Brain 45 oz. Cerebellum 5¾ oz.	Lungs very much congested in their lower lobes; some small cretaceous masses in the apex of left lung. Heart 8½ oz., thin walled and flabby; muscular tissue somewhat fatty; valves normal.	Liver 47 oz., normal; spleen 4½ oz., normal; kidneys slightly granular, cortical portion thinned, right 4¼ oz., left 4½ oz.
Dec. 22	Oct. 10, 1871	56 Married	Acute Melancholia. Very emaciated.	Ten weeks. Not known.	Exhaustion, after acute melancholia.	Slight adhesion of the dura mater; slight opacities of the arachnoid and pia mater. The arteries in the circle of Willis were very atheromatous; their contractility must have been almost entirely lost; those on the right side were dilated, those on the left contracted. The brain substance was rather soft and anemic. Weight of cerebrum 44 oz.; of cerebellum 5¼ oz. Excess of serum in the cranial cavity.	Lungs congested at the bases, otherwise normal. Heart 7¾ oz.; wallsthin and flabby; slightly fatty.	Liver 43 oz., normal; spleen 3¼ oz., normal; kidneys normal, right 4½ oz., left 4 oz.

DIETARY TABLE.

BREAKFAST.

Every Day.. Males .. Tea, with 7 oz. of Bread and Butter.

Females.. ,, 6 ditto

DINNER.

Sunday Males { 6 oz. Boiled Beef } 4 oz. Bread, $\frac{3}{4}$ lb. Vegetables, 1 pt. Beer.
free from bone }

Females.. 5 ,, ,, 4 ,, $\frac{1}{2}$,, $\frac{1}{2}$,,

Monday Males .. 6 ,, Roast Mutton, 4 ,, $\frac{3}{4}$,, 1 ,,

Females.. 5 ,, ,, 4 ,, $\frac{1}{2}$,, $\frac{1}{2}$,,

Tuesday Males .. 6 ,, Boiled Mutton 4 ,, $\frac{3}{4}$,, 1 ,,
